INTRODUCTION

Buttons on your phone sticking or not working? Here's how to replace them!

TOOLS:

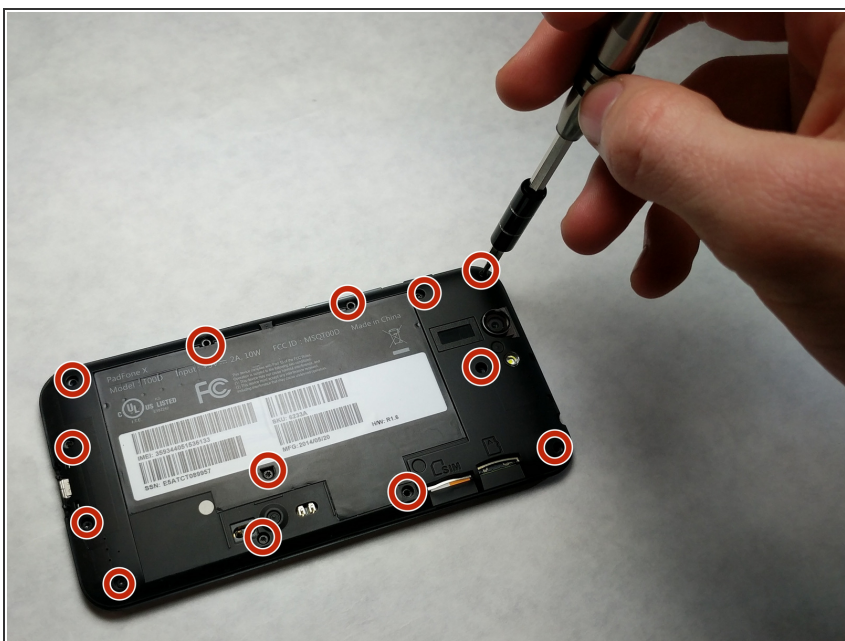

- [iFixit Opening Tools](#) (1)
 - [T5 Torx Screwdriver](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Power and Volume Buttons

- Pry off the back cover with the blue plastic opening tool.
- ⓘ Removing the cover may require a bit of force.

Step 2

- Remove thirteen 3.6mm screws using the T5 Torx Screwdriver.

Step 3

- Once the screws are removed, the mid-frame can be lifted off of the phone.

Step 4

- Grasp the button strip with tweezers.
- Pull the buttons upwards gently. The buttons should remove easily.

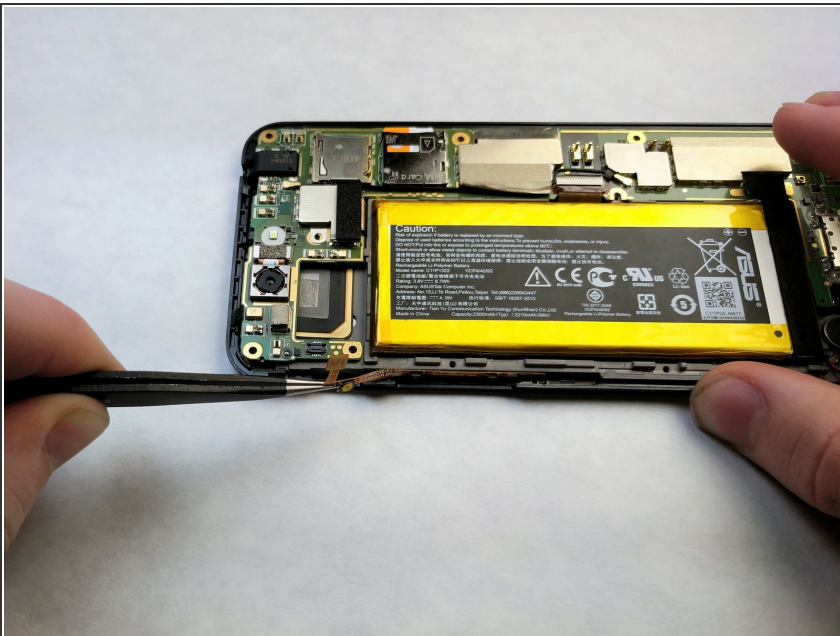

Step 5

- Use the blue plastic opening tool to disconnect the orange sensor strip.

⚠ Applying too much force may damage the connector.

Step 6

- Grasp the sensor with the tweezers.
 - Pull outwards away from the phone.
- ⓘ The sensor is held on by adhesive. You will need to apply some force when removing.

To reassemble your device, follow these instructions in reverse order.
